

Riverview Solar Project Public Meeting

BluEarth Renewables is proposing to develop the Riverview Solar Project to be located approximately 1.5 km north of Radville, SK. The Project would generate up to approximately 40 megawatts of electrical power that would be transmitted to the Saskatchewan electrical system. The Project would consist of solar photovoltaic panels, panel racking systems, internal access roads, cabling, electrical inverters and other related electrical equipment. Equipment for the Project is proposed to be contained within two quarter sections of land on Hwy 28, NE-24-06-18-W2M and SE-24-06-18-W2M. The Project will be bid into the SaskPower solar generation facility request for proposals process and, if awarded a contract, would be operational by December 31, 2018.

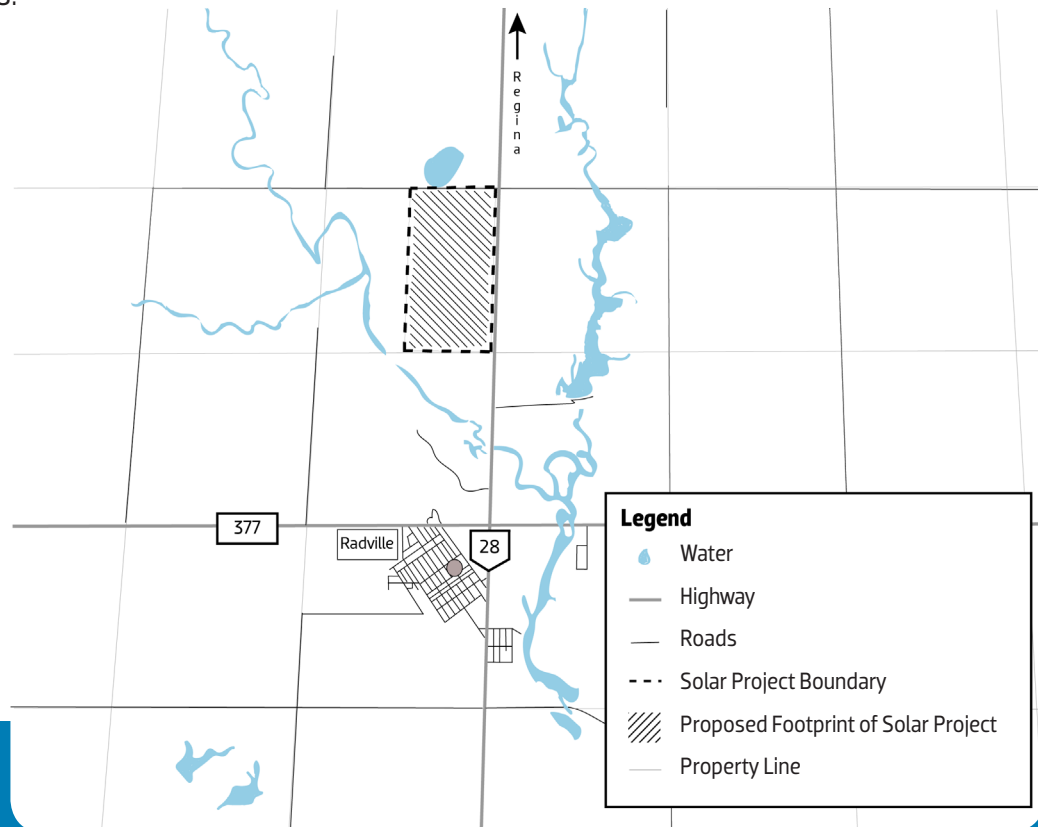

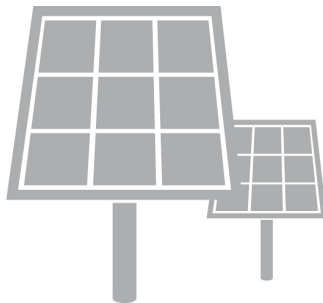

Public Meeting

BluEarth representatives will be hosting a public meeting to discuss the project and answer questions.

Date: Thursday, November 16th, 2017

Time: 5:30 pm to 8:00 pm

Location: Radville Senior Citizen Club
614 Healy Avenue
Radville, Saskatchewan
