Attention: Chief James R. Marsden

**Notice of a Proposal to Engage in a Renewable Energy Project
Notice of First Public Meeting – Loyalist Solar Project – June 29, 2016**

Dear Chief James R. Marsden:

Loyalist Solar LP, a subsidiary of BluEarth Renewables Inc. submitted a proposal to the Independent Electricity System Operator (IESO) under the Large Renewable Procurement (LRP) process on September 1, 2015. Loyalist Solar LP was subsequently awarded a contract by the IESO to generate electricity, and the project will now require approval under *Ontario Regulation 359/09 – Renewable Energy Approval (REA)* under Part V.0.1 of the *Ontario Environmental Protection Act*.

Loyalist Solar LP is proposing to design and construct a ground mounted solar facility with a name plate capacity of 54 MW (megawatts) alternating current, to be known as the “Loyalist Solar Project,” located in the Township of Stone Mills, and in the County of Lennox & Addington.

As per the requirements of the REA process, included with this letter, you will find a copy of the draft Project Description Report (PDR) and combined Notice of a Proposal and Notice of First Public Meeting for the proposed project.

As specified in the REA regulation (Section 15.6.5 and 17), a project proponent is required to:

- Notify Aboriginal communities of the proponent’s intent to develop the project;
- Provide Aboriginal communities with a copy of the draft PDR;
- Provide information regarding any adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty Rights;
- Notify Aboriginal communities of each of the REA reports that are to be released and provide a written summary of each prior to their release to the public; and
- Make a written request to Aboriginal communities to provide in writing any information available to the communities that, in their opinions, should be considered in preparing the REA reports. In particular, any information the community may have about the adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty Rights and any measures for mitigating those adverse impacts is requested.

The following addresses the remaining above-noted requirements:

Project Description Report

The draft PDR for this project provides an overview of the project as well as a location map. It has been attached for your information.

Information Regarding any Adverse Impacts on Aboriginal or Treaty Rights

At this time, Loyalist Solar LP has no specific information with regard to potentially adverse effects that the project could have on the constitutional and/or Treaty Rights of Aboriginal communities.

Request for Information

Through this letter, Loyalist Solar LP is making a request to your community for information that should be considered in the planning of this project. In particular, we request any information regarding potential adverse impacts of the project on constitutionally protected Aboriginal or Treaty Rights and recommendations for measures to mitigate these adverse impacts. Also, if you have any information regarding potential negative environmental impacts or impacts on the community, and how these could be avoided, minimized and/or mitigated, we request that you share them with us.

REA Reporting

In addition to the PDR, the following documents are will be submitted to the MOECC as part of a REA application:

- Construction Plan Report;
- Design and Operations Report;
- Decommissioning Plan Report;
- Noise Study Report;
- Water Assessment;
- Consultation Report;
- Natural Heritage Assessment;
- Archaeological Assessments;
- Cultural Heritage Assessment; and
- Supporting Documents, as required.

Loyalist Solar LP is in the process of preparing these reports. Copies of these documents, along with a summary of each, will be provided to your community and contacts identified by you, for review prior to their release to the public, at least 60 days prior to the second public meeting.

The first of two public meetings is being held on June 29, 2016. The attached notice provides more information on this event, and will appear in the Napanee Beaver and Napanee Guide on May 26, 2016. An electronic version of the attached notice is also available upon request for posting on your website or for use in community newsletters. Also, please let us know if you have a community newspaper or radio station that you would like notices to be sent to. We will notify you of the second public meeting date once it has been determined.

Throughout the REA process, Loyalist Solar LP is committed to ongoing engagement with interested Aboriginal communities. We are available to meet to discuss the project and results of the REA process, as well as to learn about your community interests and potential concerns. Please confirm if you would like us to add anyone to the circulation list for your community and if they should be sent information directly, or copied on notices provided to you.

Also, please forward any community specific consultation protocols that we should be aware of.

Additionally, if you have any questions, comments, or concerns about the project or any of the attached documents, please do not hesitate to contact me.

Yours sincerely,

LOYALIST SOLAR LP

- Provide Aboriginal communities with a copy of the draft PDR;
- Provide information regarding any adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty Rights;
- Notify Aboriginal communities of each of the REA reports that are to be released and provide a written summary of each prior to their release to the public; and
- Make a written request to Aboriginal communities to provide in writing any information available to the communities that, in their opinions, should be considered in preparing the REA reports. In particular, any information the community may have about the adverse impacts that

the project may have on constitutionally protected Aboriginal or Treaty Rights and any measures for mitigating those adverse impacts is requested.

The following addresses the remaining above-noted requirements:

Project Description Report

The draft PDR for this project provides an overview of the project as well as a location map. It has been attached for your information.

Information Regarding any Adverse Impacts on Aboriginal or Treaty Rights

At this time, Loyalist Solar LP has no specific information with regard to potentially adverse effects that the project could have on the constitutional and/or Treaty Rights of Aboriginal communities.

Request for Information

Through this letter, Loyalist Solar LP is making a request to your community for information that should be considered in the planning of this project. In particular, we request any information regarding potential adverse impacts of the project on constitutionally protected Aboriginal or Treaty Rights and recommendations for measures to mitigate these adverse impacts. Also, if you have any information regarding potential negative environmental impacts or impacts on the community, and how these could be avoided, minimized and/or mitigated, we request that you share them with us.

REA Reporting

In addition to the PDR, the following documents are will be submitted to the MOECC as part of a REA application:

- Construction Plan Report;
- Design and Operations Report;
- Decommissioning Plan Report;
- Noise Study Report;
- Water Assessment;
- Consultation Report;
- Natural Heritage Assessment;
- Archaeological Assessments;
- Cultural Heritage Assessment; and
- Supporting Documents, as required.

Loyalist Solar LP is in the process of preparing these reports. Copies of these documents, along with a summary of each, will be provided to your community and contacts identified by you, for review prior to their release to the public, at least 60 days prior to the second public meeting.

The first of two public meetings is being held on June 29, 2016. The attached notice provides more information on this event, and will appear in the Napanee Beaver and Napanee Guide on May 26, 2016. An electronic version of the attached notice is also available upon request for posting on your website or for use in community newsletters. Also, please let us know if you have a community newspaper or radio

station that you would like notices to be sent to. We will notify you of the second public meeting date once it has been determined.

Throughout the REA process, Loyalist Solar LP is committed to ongoing engagement with interested Aboriginal communities. We are available to meet to discuss the project and results of the REA process, as well as to learn about your community interests and potential concerns. Please confirm if you would like us to add anyone to the circulation list for your community and if they should be sent information directly, or copied on notices provided to you.

Also, please forward any community specific consultation protocols that we should be aware of.

Additionally, if you have any questions, comments, or concerns about the project or any of the attached documents, please do not hesitate to contact me.

Yours sincerely,

LOYALIST SOLAR LP

Attention: Chief Kelly LaRocca

**Notice of a Proposal to Engage in a Renewable Energy Project
Notice of First Public Meeting – Loyalist Solar Project – June 29, 2016**

Dear Chief Kelly LaRocca:

Loyalist Solar LP, a subsidiary of BluEarth Renewables Inc. submitted a proposal to the Independent Electricity System Operator (IESO) under the Large Renewable Procurement (LRP) process on September 1, 2015. Loyalist Solar LP was subsequently awarded a contract by the IESO to generate electricity, and the project will now require approval under *Ontario Regulation 359/09 – Renewable Energy Approval (REA)* under Part V.0.1 of the *Ontario Environmental Protection Act*.

Loyalist Solar LP is proposing to design and construct a ground mounted solar facility with a name plate capacity of 54 MW (megawatts) alternating current, to be known as the “Loyalist Solar Project,” located in the Township of Stone Mills, and in the County of Lennox & Addington.

As per the requirements of the REA process, included with this letter, you will find a copy of the draft Project Description Report (PDR) and combined Notice of a Proposal and Notice of First Public Meeting for the proposed project.

As specified in the REA regulation (Section 15.6.5 and 17), a project proponent is required to:

- Notify Aboriginal communities of the proponent’s intent to develop the project;
- Provide Aboriginal communities with a copy of the draft PDR;
- Provide information regarding any adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty Rights;
- Notify Aboriginal communities of each of the REA reports that are to be released and provide a written summary of each prior to their release to the public; and
- Make a written request to Aboriginal communities to provide in writing any information available to the communities that, in their opinions, should be considered in preparing the REA reports. In particular, any information the community may have about the adverse impacts that the project may have on constitutionally protected Aboriginal or Treaty Rights and any measures for mitigating those adverse impacts is requested.

The following addresses the remaining above-noted requirements:

Project Description Report

The draft PDR for this project provides an overview of the project as well as a location map. It has been attached for your information.

Information Regarding any Adverse Impacts on Aboriginal or Treaty Rights

At this time, Loyalist Solar LP has no specific information with regard to potentially adverse effects that the project could have on the constitutional and/or Treaty Rights of Aboriginal communities.

Request for Information

Through this letter, Loyalist Solar LP is making a request to your community for information that should be considered in the planning of this project. In particular, we request any information regarding potential adverse impacts of the project on constitutionally protected Aboriginal or Treaty Rights and recommendations for measures to mitigate these adverse impacts. Also, if you have any information regarding potential negative environmental impacts or impacts on the community, and how these could be avoided, minimized and/or mitigated, we request that you share them with us.

REA Reporting

In addition to the PDR, the following documents are will be submitted to the MOECC as part of a REA application:

- Construction Plan Report;
- Design and Operations Report;
- Decommissioning Plan Report;
- Noise Study Report;
- Water Assessment;
- Consultation Report;
- Natural Heritage Assessment;
- Archaeological Assessments;

June 2, 2016

Dear Mr. Bird:

Thank you for the information you sent to Hiawatha First Nation regarding the Loyalist Solar Project which is being proposed within Hiawatha First Nation's Traditional and Treaty Territories. Hiawatha First Nation appreciates that Loyalist Solar LP and BluEarth Renewables Inc recognize the importance of First Nations Consultation and that your office is conforming to the requirements within the Duty to Consult Process. The correspondence Hiawatha First Nation has received is not considered meaningful consultation but rather information sharing.

As per the Hiawatha First Nation Consultation Protocol, your proposed project is deemed to have little, if any, impact on Hiawatha First Nation's traditional territory and/or rights. Please keep us apprised of any updates, archaeological findings, and/or of any environmental impacts, should they occur. Hiawatha First Nation requests you contact us if archaeological artifacts are found as we require our trained archaeological liaisons be present at the archaeological sites during the assessments. We also ask that you forward any archaeological reports to Hiawatha First Nation as they are completed. Any maps pertaining to the project should be sent to Hiawatha First Nation in a shape file.

Hiawatha First Nation reserves the right to provide additional comment should further development result in additional potential impact on our traditional territory and rights. Please be aware that while we request to be kept apprised throughout all phases of this project, we may not always have representation at all stakeholders meetings.

Further correspondence may be directed to my attention at the mailing address above or the e-mail address below.

Sincerely,

Lori Loucks

Archaeological Stage 2 Update – Loyalist Solar Project

Dear Chief Phyllis Williams:

As you are aware, Loyalist Solar LP, a limited partnership between the Mohawks of the Bay of Quinte and BluEarth Renewables Inc. was awarded a contract to generate electricity under the Large Renewable Procurement 1 process and is now proposing to design and construct the Loyalist Solar Project (the "Project"). The Project will be located in the Township of Stone Mills, County of Lennox & Addington.

By way of this letter, we would like to provide an update regarding the Stage 1 and 2 Archaeological Assessments. These field studies are now finished and the associated report is currently being written by Archaeological Research Associates (ARA). We expect this to be completed shortly and we would be happy to provide it to Curve Lake First Nation once finalized. In the meantime, please find the enclosed summary from ARA that describes the Aboriginal and Euro-Canadian archaeological resources that have been identified.

Also, we wanted to follow up regarding the initial letter we sent to Curve Lake First Nation in May of this year. In that letter, we had asked if the Nation was aware of any information that should be considered in preparing the Renewable Energy Approval reports. In addition, we had asked if the Nation is aware of any adverse impacts that the Project may have on constitutionally protected Aboriginal or Treaty Rights and any measures for mitigating those adverse impacts. To date we have not had any correspondence from Curve Lake First Nation in regards to these requests, so please contact us if there is anything you wish to provide.

Please let me know if I can provide any additional details about the archaeological assessments or the Project itself.

Yours sincerely,

Archaeological Stage 2 Update – Loyalist Solar Project

Dear Chief LaRocca:

As you are aware, Loyalist Solar LP, a limited partnership between the Mohawks of the Bay of Quinte and BluEarth Renewables Inc. was awarded a contract to generate electricity under the Large Renewable Procurement 1 process and is now proposing to design and construct the Loyalist Solar Project (the "Project"). The Project will be located in the Township of Stone Mills, County of Lennox & Addington.

By way of this letter, we would like to provide an update regarding the Stage 1 and 2 Archaeological Assessments. These field studies are now finished and the associated report is currently being written by Archaeological Research Associates (ARA). We expect this to be completed shortly and we would be happy to provide it to Mississauga of Scugog Island First Nation once finalized. In the meantime, please find the enclosed summary from ARA that describes the Aboriginal and Euro-Canadian archaeological resources that have been identified.

Also, we wanted to follow up regarding the initial letter we sent to Mississauga of Scugog Island First Nation in May of this year. In that letter, we had asked if the Nation was aware of any information that should be considered in preparing the Renewable Energy Approval reports. In addition, we had asked if the Nation is aware of any adverse impacts that the Project may have on constitutionally protected Aboriginal or Treaty Rights and any measures for mitigating those adverse impacts. To date we have not had any correspondence from Mississauga of Scugog Island First Nation in regards to these requests, so please contact us if there is anything you wish to provide.

Please let me know if I can provide any additional details about the archaeological assessments or the Project itself.

Yours sincerely,

LOYALIST SOLAR LP

Enclosed: Stage 1 and 2 Archaeological Assessment Summary for Loyalist Solar Project

Subject: RE: Loyalist Solar Project
From: Tom Bird <tom@bluearth.ca>
Date: 10/19/2016 1:43 PM
To: 'Maxime Picard'

Hi Maxime,

We would certainly welcome an archaeological monitor from Huron Wendat First Nation to participate in the stage 3 assessments. Our archaeologists have been working on a Euro-Canadian site. I believe they will still be two or three weeks away from starting to work on a stage 3 Aboriginal site. I'm assuming the Nation would want to provide a monitor for the Aboriginal sites only.

There are a few things that we should have in place before the monitor starts. Is there a business entity that the monitor would be billing through and that would provide insurance coverage? If so, we will provide a purchase order to that business entity. Also, please let me know what the hourly rate and estimated disbursements would be for the monitor.

Please feel free to call me if you would like to discuss.

Thank you,

Tom

Hi Tom,

Thanks for your answer.

Good to know that the Stage 3 has already started.

How long do you expect the Stage 3 to take ?

Is there any chance that the Huron-Wendat Nation could send a monitor on site ?

Best regards,

Maxime

Hello Maxime,

Some of the stage 3 work has already started and we're trying to get the rest underway before winter starts. Please let me know if you need any more details about the sites or the schedule. Once the stage 3 work is completed, we will let you know if any further assessments are recommended.

Sincerely,

Tom

Subject: RE: Loyalist Solar Project

Hello Maxine,

No formal reports have been completed yet since the Stage 1 and 2 work is currently underway. The assessments are being conducted by Archaeological Research Associates and will continue until mid-August. Only one First Nation find spot has been identified so far. The below description of the find is from our archaeologist. Please let me know if you would like any additional information.

The following discoveries were made:

NAP021_Field21_Point1: The blade portion of a broad chert projectile point was located on the surface of the field. The stem is broken at the side notches and the base is missing. It is possible that this point is of the 'Crawford Knoll' type – a Late Archaic point type dating to the period 1500-500 BC (2500 – 3500 years old). It is made from Onondaga chert – a raw material from the north shore of Lake Erie and parts of New York State. Artifacts made of this chert are found throughout southern and eastern Ontario.

NAP021_Field21_Point2: A section of the blade of a projectile point or knife. It is finely thinned and the blade margins have been delicately worked. Insufficient of the artifact remains to be able to make any determination of age or cultural affiliation although it is undoubtedly of pre-Contact origin. It is made of grey chert – possibly Onondaga – although this is uncertain.

On discovery of each of these items, the surface survey transect interval was reduced from 5 metres to 1 metre and the field surface was carefully scrutinised for any other artifacts for a radius of at least 20 metres. No other artifacts were discovered. Following the intensified surface survey, a 1 metre

test excavation unit was excavated at each location in order to see whether other artifacts were contained within the soil. All soils from the test unit were sifted through 6mm. hardware cloth screen and excavation continued for at least 5cm into sterile subsoil. No further artifacts were recovered. On the basis of this work, it can be reasonably assumed that these artifacts were 'casual loss' artifacts, probably lost or broken by people hunting along the margins of the wetland.

NAP021_F21_FL1 and NAP021_F21_FL2: The small secondary flakes of an unidentified chert were recovered from the surface of the field. These are chips that are detached during making or sharpening chipped stone tools such as arrowheads and knives. As before, the surface survey was intensified in the vicinity of each discovery, but no further artifacts were discovered. The presence of chert flakes sometimes indicates activity areas such as campsites or working areas. In the absence of any other artifacts or evidence of past cultural activity, these do not indicate the presence of an archaeological site. At this point in the archaeological assessment of the Loyalist Solar Project, no additional pre-Contact artifacts have been found.

Hello Ms. Picard,

I have attached shapefiles for the boundaries of the area being considered for the solar facility and the connection line. The actual location of the infrastructure is being confirmed over the next several weeks, but will fall within these boundaries. I'd be happy to provide you with an update once we have narrowed down the project location.

Please let me know if I can provide any additional information.

Dear Mr. Bird:

Thank you for the information you sent to Hiawatha First Nation regarding the Loyalist Solar Project which is being proposed within Hiawatha First Nation's Traditional and Treaty Territories. Hiawatha First Nation appreciates that BluEarth Renewables recognizes the importance of First Nations Consultation and that your office is conforming to the requirements within the Duty to Consult Process. The correspondence Hiawatha First Nation has received is not considered meaningful consultation but rather information sharing.

As per the Hiawatha First Nation Consultation Protocol, your proposed project is deemed to have little, if any, impact on Hiawatha First Nation's traditional territory and/or rights. Thank you for sending the Archaeological Assessment to my attention. I will review it and contact you should I have any questions.

Hiawatha First Nation reserves the right to provide additional comment should further development result in additional potential impact on our traditional territory and rights. Please be aware that while we request to be kept apprised throughout all phases of this project, we may not always have representation at all stakeholders meetings.

Further correspondence may be directed to my attention at the mailing address above or the e-mail address below.

Sincerely,

Lori Loucks

Chief James R. Marsden
Alderville First Nation
PO Box 46
Roseneath ON K0K 2X0

Release of Draft REA Reports – Loyalist Solar Project

Dear Chief James R. Marsden:

As you are aware, Loyalist Solar LP, a limited partnership between Mohawks of the Bay of Quinte and BluEarth Renewables Inc., by its General Partner BER Ontario Solar GP Inc., submitted a proposal to the Independent Electricity System Operator (IESO) under the Large Renewable Procurement (LRP) process on September 1, 2015. Loyalist Solar LP was subsequently awarded a contract by the IESO to generate electricity, and the project now requires approval under *Ontario Regulation 359/09 – Renewable Energy Approval (REA)* under Part V.0.1 of the Ontario *Environmental Protection Act*.

Loyalist Solar LP is proposing to design and construct a ground mounted solar facility with a name plate capacity of 54 megawatts alternating current (MW_{AC}), to be known as the "Loyalist Solar Project," located in the Township of Stone Mills, County of Lennox & Addington.

In May 2016, you were provided with an introductory letter; draft Project Description Report (PDR) and a Notice of Proposal and Notice of First Public Meeting for the proposed Project. In that letter you were asked to provide any information that should be considered in preparing the REA reports. In addition, you were asked to provide any information in regards to any constitutionally protected Aboriginal treaty rights that may be adversely impacted by the Project. We respectfully ask again if you have any such information.

In addition, we would like to inform you that the draft REA studies and reports are now complete and the second public meeting date is anticipated to be held in January, 2017 (you will receive a notice confirming the details at a later date).

As per the requirements of the REA process, included with this letter, you will find the draft REA documents, including:

- REA Summary (summarizes REA reports);
- Draft Project Description Report;
- Draft Construction Plan Report;

Chief James R. Marsden, Alderville First Nation

Page 2

November 7, 2016

- Draft Design and Operations Report;
- Draft Decommissioning Plan Report;
- Draft Noise Study Report;
- Draft Water Assessment Report and Water Body Report;
- Draft Natural Heritage Assessment (4 reports);
- Archaeological Assessment (Stage 1 and 2);
- Cultural Heritage Assessment; and
- Executive Summary Report.

Additional copies of the draft REA reports can be provided in both hard copy and electronic forms should you request them. These documents will also be available on the proponent's website: www.bluearth.ca/loyalist.

Throughout the REA process, Loyalist Solar LP is committed to ongoing engagement with interested Aboriginal communities. We are available to meet to discuss the Project and the REA reports as well as to learn about your community interests and potential concerns. Please confirm if you would like us to add anyone to the circulation list for your community and if they should be sent information directly, or copied on notices provided to you.

Also, please forward any community specific consultation protocols that we should be aware of.

Additionally, if you have any questions, comments, or concerns about the Project or any of the attached documents, please do not hesitate to contact me.

Yours sincerely,

LOYALIST SOLAR LP

- Archaeological Assessment (Stage 1 and 2);
- Cultural Heritage Assessment; and
- Executive Summary Report.

Additional copies of the draft REA reports can be provided in both hard copy and electronic forms should you request them. These documents will also be available on the proponent's website: www.bluearth.ca/loyalist.

Throughout the REA process, Loyalist Solar LP is committed to ongoing engagement with interested Aboriginal communities. We are available to meet to discuss the Project and the REA reports as well as to learn about your community interests and potential concerns. Please confirm if you would like us to add anyone to the circulation list for your community and if they should be sent information directly, or copied on notices provided to you.

Also, please forward any community specific consultation protocols that we should be aware of.

Additionally, if you have any questions, comments, or concerns about the Project or any of the attached documents, please do not hesitate to contact me.

Yours sincerely,

LOYALIST SOLAR LP

Release of Draft REA Reports – Loyalist Solar Project

Dear Kris Nahrgang, Kawartha Nishnawbe:

As you are aware, Loyalist Solar LP, a limited partnership between Mohawks of the Bay of Quinte and BluEarth Renewables Inc., by its General Partner BER Ontario Solar GP Inc., submitted a proposal to the Independent Electricity System Operator (IESO) under the Large Renewable Procurement (LRP) process on September 1, 2015. Loyalist Solar LP was subsequently awarded a contract by the IESO to generate electricity, and the project now requires approval under *Ontario Regulation 359/09 – Renewable Energy Approval (REA)* under Part V.0.1 of the Ontario *Environmental Protection Act*.

Loyalist Solar LP is proposing to design and construct a ground mounted solar facility with a name plate capacity of 54 megawatts alternating current (MW_{AC}), to be known as the "Loyalist Solar Project," located in the Township of Stone Mills, County of Lennox & Addington.

In May 2016, you were provided with an introductory letter; draft Project Description Report (PDR) and a Notice of Proposal and Notice of First Public Meeting for the proposed Project. In that letter you were asked to provide any information that should be considered in preparing the REA reports. In addition, you were asked to provide any information in regards to any constitutionally protected Aboriginal treaty rights that may be adversely impacted by the Project. We respectfully ask again if you have any such information.

In addition, we would like to inform you that the draft REA studies and reports are now complete and the second public meeting date is anticipated to be held in January, 2017 (you will receive a notice confirming the details at a later date).

As per the requirements of the REA process, included with this letter, you will find the draft REA documents, including:

- REA Summary (summarizes REA reports);
- Draft Project Description Report;

Kawartha Nishnawbe, c/o Kris Nahrgang

Hello Mr. Mowat,

We have sent the Loyalist Renewable Energy Approval package to your office which includes all the Stage 1 and 2 Archaeological Assessments. The package also contains all the draft reports that will comprise our application to the Ministry of Environment and Climate Change, once submitted. Please let me know if this package did not arrive for some reason.

Best regards,
Tom

Subject: Loyalist Solar Project

Good Afternoon Mr. Bird:

Regarding the Loyalist Solar LP I want to thank you for your correspondence dated Sept. 26, 2016 and apologize for my late response. I would like to request

copies of the Stage 1 and 2 Archaeological Assessments, which can be mailed to my attention at the address below. Insofar as impacts to the rights issue, this is somewhat in flux as we speak, however, seeing that the project is landlocked so to speak and off a primary water course (Salmon River) I do not see any potential for impact in this regard.

I look forward to receiving the reports.

Thank you,

Dave Mowat

RE: Loyalist Solar Project

The Mohawks of the Bay of Quinte (MBQ) has embarked on a renewable energy project in partnership with BluEarth Renewables (BluEarth) to construct a 54 MW_{AC} solar power project in the Township of Stone Mills, Ontario. This project, situated on private lands, is known as the Loyalist Solar Project (Project).

In early June, in accordance with Ontario Regulations (*O. Reg 359/09*) governing renewable energy projects, the Project provided copies of the Draft Project Description Report and the Notice of Public Approval (REA), consultation with affected Aboriginal communities to identify how any potentially adverse impacts on their rights can be avoided, minimized and/or mitigated, must be included as part of any application submission.

Some communities, that have responded thus far, have indicated no potential adverse impact to their Aboriginal or treaty rights, while others have provided an archaeology liaison during Stage 1 and 2 of the archaeological site assessment. As the Project moves into Stage 3 archaeological fieldworks, all communities are being kept apprised of the digs, as requested, and others have indicated an interest for an on-site presence during the archaeological fieldworks. As with any renewable energy project within our territory, MBQ staff will also review the various documents for this Project with the view to ensuring Aboriginal and treaty rights, and the environment, are not adversely impacted.

Solar farm operations are typically a cradle to grave endeavor with a small environmental footprint, however, there is the requirement to ensure an "Aboriginal community has the opportunity to articulate the nature and basis for any concern,

including the nature of any potential adverse impact on rights, and possible options to avoid, minimize or mitigate the impacts."

In keeping with the intent of O. Reg 359/09, draft REA Reports are now available for viewing and comment prior to the final Open House which is scheduled January 31, 2017. Documents are being sent to your community and full reports posted on the Project website: www.blueearthrenewables.com/Loyalist. MBQ has engaged Aboriginal Business Network (ABN) to assist MBQ, and the partnership, in its efforts to engage and consult with the Aboriginal communities and in doing so to gather and compile any relevant issues Aboriginal communities may have about our Project. To this end, ABN will be contacting community representatives within the next couple of weeks. ABN contact for Aboriginal consultation is Angela Gillies and can be contacted at (705) 761-1775 or a.rose.gillies@gmail.com. For Project update, information sessions, please contact either Angela or Tom Bird of BluEarth at tom@bluearth.ca.

Chief, as you can understand, this is a very important project to the Mohawks of the Bay of Quinte. It has the potential to help our community, in the near term, and to provide for our future generations in the long term. We thank you for your immediate attention to this matter. Please call me if you have any questions, concerns, or would just like to speak about this Project.

Dear Tom Bird,

RE: Loyalist Solar Project

I acknowledge receipt of your correspondence, received on 24/11/2016 regarding the above project.

As you may be aware, the area in which your project is proposed is situated within the Traditional Territory of Curve Lake First Nation. Also within the Williams Treaties Territory and is the subject of a claim under Canada's Specific Claims Policy. We strongly suggest that you provide Karry Sandy-Mackenzie, Williams Treaty First Nation Claims Coordinator, 8 Creswick Court, Barrie, ON L4M 2S7, with a copy of your proposal as your obligation to consult to also extend to the other First Nations of the Williams Treaties.

Curve Lake First Nation is requiring a File Fee for this project in the amount of \$250.00. Also due to the size and scale of this solar project we will be requesting a \$5000 Review of Large Materials Fee as outlined in the Consultation and Accommodation Standards, a copy of which is enclosed with this letter. These Fees include project updates as well as review of standard materials, project overviews, and review of large materials; reports and detailed applications.

Based on the information that you have provided us with respect to Loyalist Solar Project Curve Lake First Nation requires a Special Consultation Framework for this project. Information on this Framework can be found on page 9 of the Consultation and Accommodation Standards.

In order to assist us in providing you with timely input, it would be appreciated if you could provide a summary statement indicating how the project will address the following areas that are of concern to our First Nation within our Traditional and Treaty Territory: possible environmental impact to our drinking water, endangerment to fish and wild game, impact on Aboriginal heritage and cultural values, and to endangered species, lands, savannas etc.

After the information is reviewed it is expected that you or a representative will be in contact to make arrangements to discuss this matter in more detail and possibly set up a date and time to meet with Curve Lake First Nation in person.

www.curvelakefirstnation.ca

Although we have not conducted exhaustive research nor have we the resources to do so, Curve Lake First Nation Council is not currently aware of burial or archaeological sites in your proposed area. Please note, that we have particular concern for the remains of our ancestors. Should excavation unearth bones, remains or other such evidence of a native burial site or any other Archaeological findings, we must be notified without delay. In the case of a burial site, Council reminds you of your obligations under the *Cemeteries Act* to notify the nearest First Nation Government or other community of Aboriginal people which is willing to act as a representative an whose members have a close cultural affinity to the interred person. As I am sure you are aware, the regulations further state that the representative is needed before the remains and associated artifacts can be removed. Should such a find occur, we request that you contact our First Nation immediately.

Curve Lake First Nation also has available, trained Archaeological Liaisons who are able to actively participate in the archaeological assessment process as a member of a field crew, the cost of which will be borne by the proponent.

Although we may not always have representation at all stakeholders meetings, it is our wish to be kept appraised throughout all phases of this project.

Should you have further questions or if you wish to hire a liaison for a project, please feel free to contact Melissa Dokis or Kaitlin Hill, Lands and Resources Consultation Liaisons, at 705-657-8045 x 222 or via email at MelissaD@curvelake.ca and KaitlinH@Curvelake.ca.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Phyllis Williams'.

RE: Loyalist Solar Project **(the "Project")**

Dear Chief Phyllis Williams:

I am writing in regards to your letter dated December 8, 2016. I sincerely apologize for the delay in our response. Unfortunately, your letter had been misfiled in our office and was only just brought to my attention.

In your letter, you note the importance of copying all correspondence to Karry Sandy-Mackenzie, the Williams Treaty First Nation Claims Coordinator. I can confirm that Karry Sandy-Mackenzie has been provided with correspondence to date and going forward we will continue to provide Project-related information.

Thank you for providing the Consultation and Accommodation Standards. In regards to the \$250 File Fee and the \$5,000 Review of Large Materials Fee, Loyalist Solar LP understands the importance of determining whether or not the Project has the potential to adversely affect the rights and interests of Curve Lake First Nation and agrees to provide these fees.

As requested, a summary statement will be developed which will address potential impacts to drinking water, fish and wild game, endangered species, lands, savannas, Aboriginal heritage and cultural values. In addition to the summary statement, the Renewable Energy Application reports including the Natural Heritage Assessment, will provide valuable information in regards to these concerns and we are available to respond to any inquiries you may have about these reports. As you are aware, the Mohawks of the Bay of Quinte are a partner in the Project and have been involved in the review of potential environmental impacts and mitigations.

Also as partners, the Mohawks of the Bay of Quinte have been involved in all aspects of the archeological assessments undertaken to date. A monitor has been on site during the field season last year. The Stage 1 and Stage 2 Archaeological Assessments were provided to Curve Lake First Nation in November 2016. Loyalist Solar LP can certainly provide additional updates as the Stage 3 and 4 archaeological work is undertaken in 2017. As requested, Curve Lake First Nation will be immediately notified if any evidence of remains or a burial site are found.

We look forward to further correspondence in the near future.

Yours sincerely,

LOYALIST SOLAR LP
