

Burdett Solar Project Public Meeting

The Burdett Solar Project (the "Project"), located in the County of Forty Mile approximately 1.5 km southwest of Burdett, AB, would generate up to 20 megawatts of electrical power – enough to power up to 3,300 homes annually. The energy would be transmitted to the local electrical distribution system. The Project would consist of solar photovoltaic panels, panel racking systems, internal access roads, cabling, electrical inverters and other related electrical equipment.

After submitting an application for the construction and operation of the Project, we have now received all of the necessary approvals from the Alberta Utilities Commission (AUC) and the local municipality. In addition, we applied to the AUC for an extension to the construction completion date from January 31, 2018 to July 31, 2020. This extension will allow us to participate in the upcoming energy procurement opportunities. These processes will be competitive and aim to provide the lowest solar energy prices to Alberta. If we are successful in an upcoming procurement initiative, we anticipate construction would start no earlier than April 2019. We are also evaluating options to optimize the Project, including improved solar power technology and will be filing a further AUC permit amendment to allow for optimization of the proposed solar power generating equipment.

The Project would occupy land within quarter section SE-15-10-12-W4 at the intersection of Township Road 102 and Range Road 122.

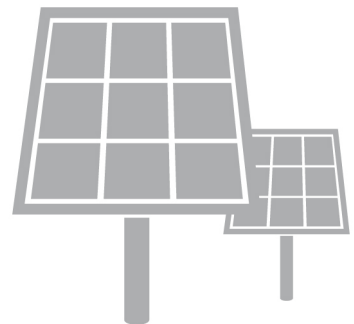

Public Meeting

As part of our commitment to ongoing dialog with the community, BluEarth will be hosting a community open house to provide a project update and receive stakeholder feedback.

Date: Tuesday, May 29, 2018

Time: 5:30 p.m. to 8 p.m. (drop-in)

Location: Burdett Community Hall, 310 Main Street, Burdett

The Burdett Solar Project is being developed by Burdett Solar Limited Partnership, which is wholly-owned by BluEarth Renewables Inc. Headquartered in Calgary, BluEarth Renewables is a private independent renewable power producer, focused on the acquisition, development, construction and operation of wind, hydro, and solar facilities.

Yellow Lake Solar Project Public Meeting

The Yellow Lake Solar Project (the "Project"), located in the County of Forty Mile approximately 19 km south of Burdett, AB, would generate up to 19 megawatts of electrical power – enough to power up to 3,100 homes annually. The energy would be transmitted to the local electrical distribution system. The Project would consist of solar photovoltaic panels, panel racking systems, internal access roads, cabling, electrical inverters and other related electrical equipment.

After submitting an application for the construction and operation of the Project, we have now received all of the necessary approvals from the Alberta Utilities Commission (AUC) and the local municipality. In addition, we applied to the AUC for an extension to the construction completion date from January 31, 2018 to July 31, 2020. This extension will allow us to participate in the upcoming energy procurement opportunities. These processes will be competitive and aim to provide the lowest solar energy prices to Alberta. If we are successful in an upcoming procurement initiative, we anticipate construction would start no earlier than April 2019. We are also evaluating options to optimize the Project, including improved solar power technology and will be filing a further AUC permit amendment to allow for optimization of the proposed solar power generating equipment.

The Project would occupy land within quarter section NW-13-8-12-W4 on Range Road 121, approximately 1.6 km south of Township Road 84 and 19 km south of Burdett.
