

The Loyalist Solar Facility has officially started operating.

After completing all major construction in February 2019, the project began commercial operations in April 2019. Our Operations team will now be responsible for managing and maintaining the facility. Over the next few months our team is focused on reclamation of the land surrounding the facility, which will be completed this summer.

We appreciated your patience during construction and we look forward to continuing to work with and give back to the community for decades to come.

MEET CAM HARTIN

Cam Hartin is our Lead Solar Technician at the Loyalist Solar Facility. Cam was born and raised in Stone Mills, Ontario and has been working in renewable energy for over 12 years.

Cam was heavily involved in the construction of this facility, and is part of the team that will be responsible for the day-to-day operations and maintenance. The facility will also be monitored in 24/7, real time by our Remote Operations Center to ensure safe and efficient operations.

GIVING BACK WHERE WE LIVE, WORK AND OPERATE

In 2018, we invested over \$75,000 across our portfolio as part of our commitment to helping build healthy, thriving communities where we live, work and operate. Our contributions were directed towards programs that support education, environment and community building.

Do you have a local community investment suggestion?

We are always looking for local input on how BluEarth can make a difference. Review our funding criteria and submit a funding application online at bluearthrenewables.com/our-funding-criteria/

Power to Change THE FUTURE™

The Loyalist Solar Facility is owned by Loyalist Solar LP, a partnership between BluEarth Renewables and the Mohawks of the Bay of Quinte. This newsletter has been provided by BluEarth Renewables on behalf of Loyalist Solar LP.

Loyalist Solar Facility

By the numbers

Nameplate capacity of
54 MW_{AC}

The facility is a

50/50
PARTNERSHIP

between BluEarth Renewables and the Mohawks of the Bay of Quinte

That's enough energy to power **11,000 homes annually**
based on average Ontario home electricity usage

Pollinator mix
is being placed around the facility to support the species population growth

The project provided over
347,000
hours of employment during construction

We installed 
249,948
solar photovoltaic panels to generate electricity

& 28 inverters
to convert power generated from DC to AC

BluEarth Renewables brings together extraordinary people with the power to change the future™ by delivering renewable energy to the power grid every day. We are a leading, independent, power producer that acquires, develops, builds, owns and operates wind, hydro and solar facilities across North America. Our portfolio includes 333 MW net (405 MW gross) of nameplate capacity in operation and under construction and over 1,000 MW under development.
