Subject: Intent to Submit Applications for County Permits and Industrial Siting Council Permit for the Two Rivers and Lucky Star Wind Energy Projects, Carbon and Albany Counties, Wyoming

Dear Agency Representative,

Two Rivers Wind LLC and Lucky Star Wind LLC, both wholly owned subsidiaries of BluEarth Renewables US LLC, are planning to initiate local and state permit applications required to construct and operate the Two Rivers and Lucky Star Wind Projects across three private ranches in Carbon and Albany Counties, Wyoming.

The Two Rivers Wind Project comprises development of four wind powered electric generation facilities with a combined capacity of up to 280 megawatts (MW). Two Rivers I, II, and III will be situated on 15,067 acres of the Two Rivers Ranch in Carbon County north of Highway 30 and the Town of Medicine Bow. Two Rivers IV will be situated on approximately 4,500 acres of the Medicine Bow River Ranch in Albany County south of Highway 30 and west of the Town of Rock River.

The Lucky Star Wind Project comprises development of a wind powered electric generation facility with a capacity of up to 500 MW. The 56,582-acre Lookout Ranch in Albany County is located south of the Town of Rock River and southwest of Highway 30. The 34,482-acre Medicine Bow River Ranch in both Carbon and Albany Counties is located southeast of the Town of Medicine Bow and south of Highway 30.

The number and generation capacity of wind turbine generators has not yet been finalized for either project. Preliminary site plans for the Two Rivers Wind Project includes 77 wind turbine generators and 201 wind turbine generators are considered for the Lucky Star Wind Project.

Two Rivers I, II and III is anticipated to be constructed first, beginning in 2019 while Two Rivers IV is anticipated to commence construction in 2020. Commercial operations for the Two Rivers Wind Project is expected in 4Q 2020. Construction for Lucky Star is anticipated to begin in 2020 and continue through 2022, with operations scheduled to commence in 4Q 2022. Project fact sheets and preliminary site plans for both projects are enclosed. Final Project design is still underway, and locations of proposed facilities are likely to change. Additional Project information is available at the following websites: www.blueearthrenewables.com/tworivers/ and www.blueearthrenewables.com/luckystar/.

In-person meetings were held with counties, towns, and state agencies in July and September 2018 to introduce the wind projects and establish permitting expectations. The Wyoming Department of Environmental Quality Industrial Siting Division determined that a permit is needed from the Wyoming Industrial Siting Council (ISC) as both projects exceed the current statutory jurisdictional capital cost threshold of \$211.1 million and/or a commercial wind energy facility consisting of thirty (30) or more turbines (W.S. § 35-12-102). Both Carbon and Albany Counties determined that Conditional Use Permits

are required to construct and operate a commercial Wind Energy Conversion System (WECS) per their current Zoning Resolutions.

We have initiated preparation of the permit applications. Conditional Use Permit Applications are expected to be submitted to Carbon and Albany Counties in early 2019. The permit application submittal to the Industrial Siting Council is planned for early 2019 with a public hearing tentatively planned in mid-2019.

We are in the process of conducting meetings and presentations with potentially affected municipalities, counties, state agencies, and other stakeholders. The meetings serve as an opportunity to discuss potential environmental, social, and economic issues and identify mitigation recommendations and solutions to incorporate into the planning and design of the Project. The Project area of study, as identified by Wyoming Department of Environmental Quality Industrial Siting Division staff during the Jurisdictional Meeting, determined the local governments where informational meetings are being held.

Invitation to Participate

We invite you to express your agency's comments and provide feedback so that issues may be considered and addressed directly with your agency, as well as incorporated directly into the County and ISC permit applications and construction planning process.

Local informational meetings with members of the project team are scheduled at four locations over three days in November 2018 for your convenience.

Monday, November 5, 2018	Wednesday, November 7, 2018	Thursday, November 8, 2018

Two Rivers & Lucky Star Wind Projects Fact Sheet

Project Overview

Two Rivers Wind LLC and Lucky Star Wind LLC, both wholly owned subsidiaries of BluEarth Renewables US LLC, are planning to develop two wind projects across three private ranches in Carbon and Albany Counties, Wyoming. Each project will consist of two substations, electrical collector systems and roads, and 230-345 kv transmission lines to the point of interconnection.

Project Details		
	Two Rivers	Lucky Star
Location	North of Highway 30 and Medicine Bow	South of Highway 30 and Medicine Bow
Point of Interconnection	Freezeout substation	Aeolus substation
Project Area	19,500 acres	78,000 acres
Expected Capacity	280 MW	500 MW
Preliminary Site Plan	Up to 80 wind turbines on Two Rivers Ranch and up to 20 wind turbines on Medicine Bow River Ranch	Up to 100 wind turbines on Medicine Bow River Ranch and up to 200 wind turbines on Lookout Ranch
Timeline		
Permitting and Approvals	2018 - 2019	2018 - 2020
Construction	2019 - 2020	2020 - 2022
Commercial Operations	Late 2020	Late 2022
Economic Development & Community Benefits		
Cost of Construction	\$364 million*	\$650 million*
Local & State Sales Taxes	\$15 million*	\$27 million*
Lifetime Property Tax	\$30 million*	\$48 million*
Number of Jobs	170 during construction* 10 during operations and maintenance*	250 during construction* 14 during operations and maintenance*

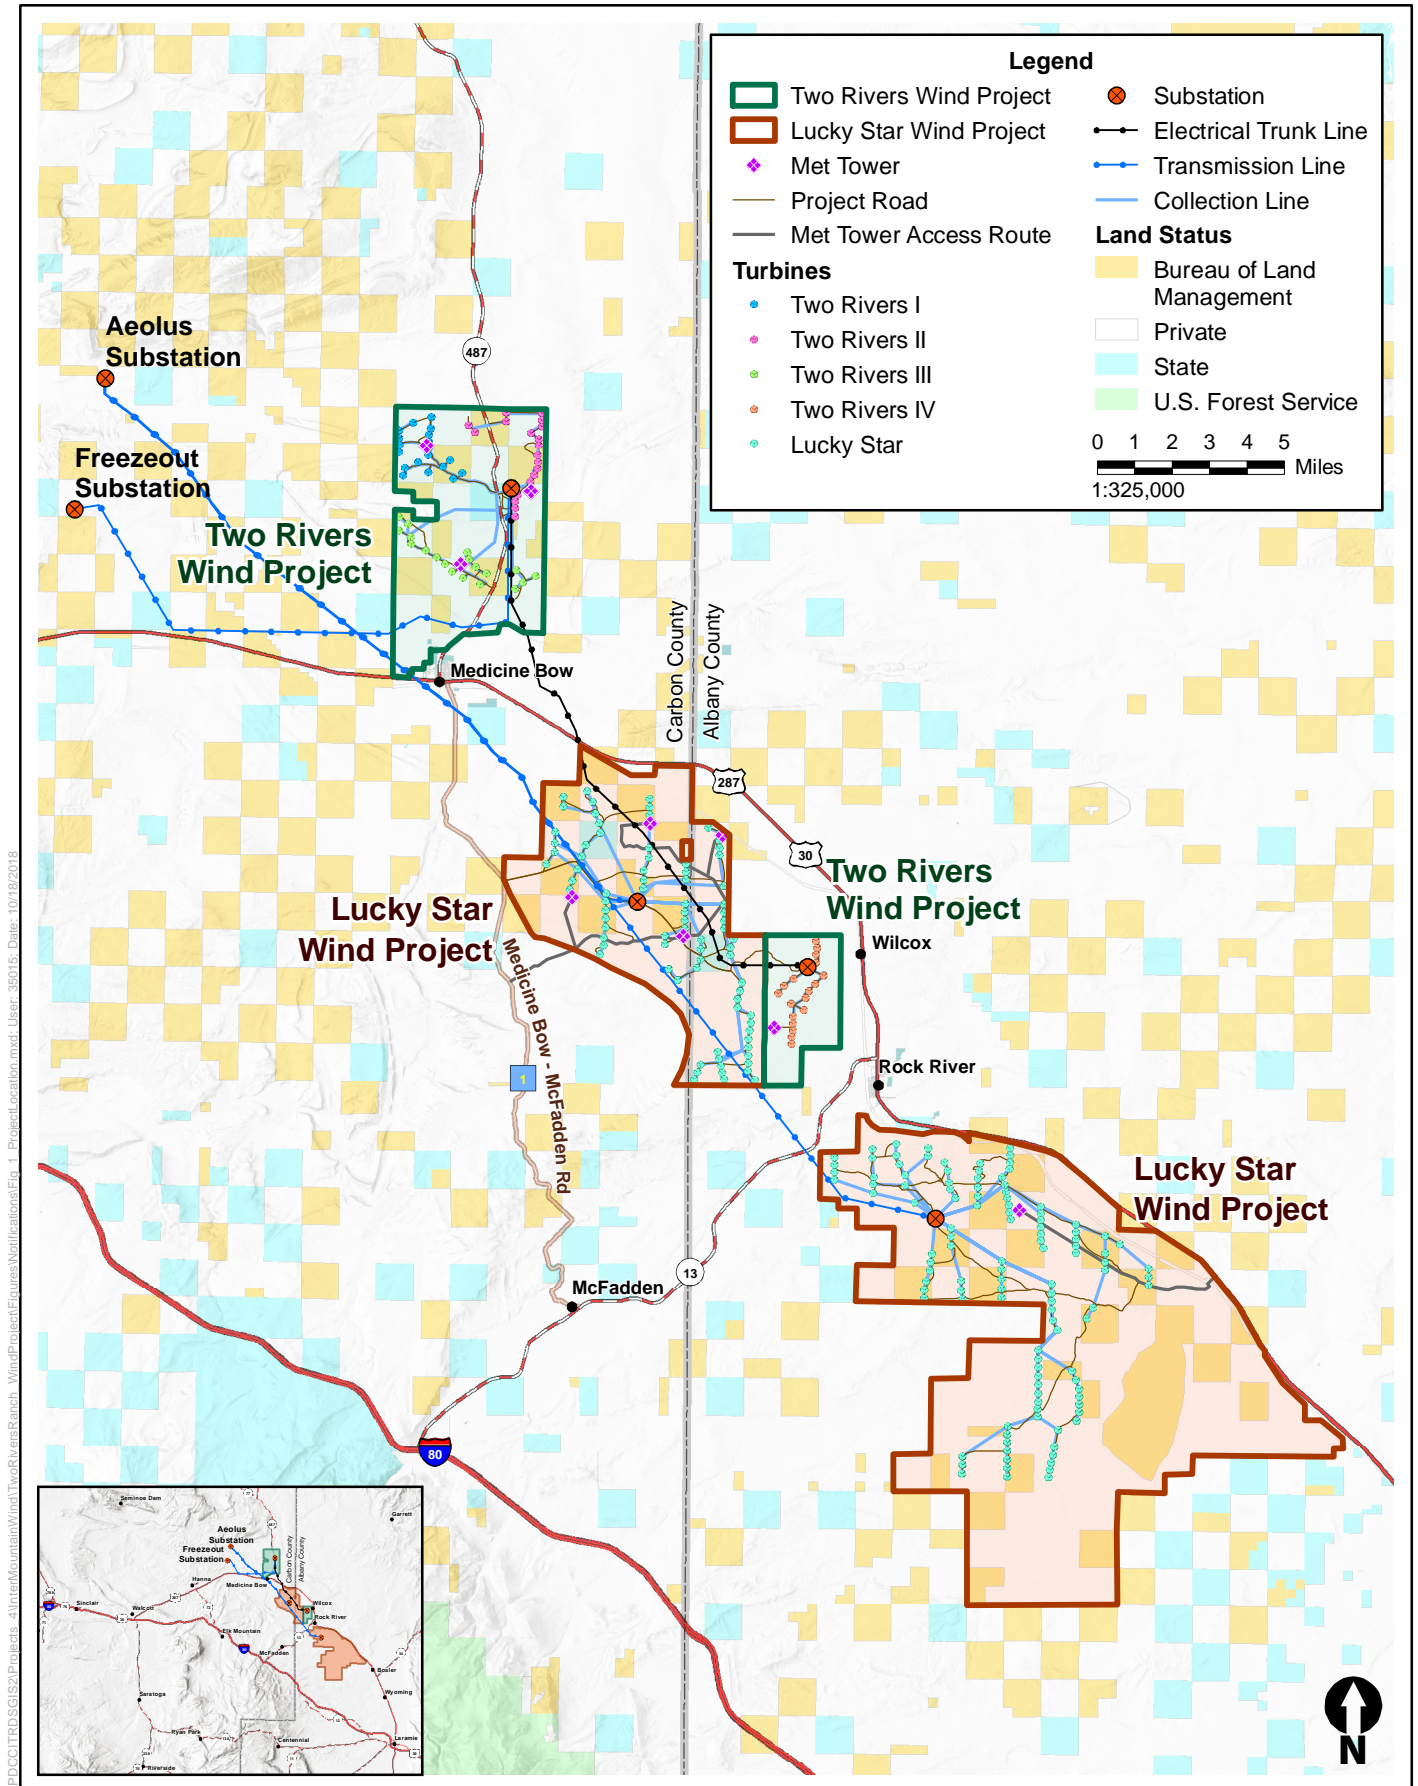

*Estimated

About BluEarth

Headquartered in Calgary, BluEarth Renewables is a private independent renewable power producer, focused on the acquisition, development, construction and operation of wind, hydro, and solar facilities.
